# About Open Development Cambodia (ODC)

## Background:

- Citizens and other stakeholders lack information to promote equitable, sustainable development and good governance.
- ODC specializes in aggregating data and developing interactive digital maps and datasets. Data from many sources are collated into an easily-accessed platform, opening space for informed discussion of development issues.

# About Open Development Cambodia

## Solution:

- ODC's maps and infographics inform the public and promote fact-based open dialogue on development.

## Users:

- Citizens, civil society, investors, researchers, journalists, and policy-makers

# About Open Development Cambodia

## Metrics:

- 55,000 unique monthly visitors for ODC website, 45 % return users, citations in media and by businesses, CSOs, and government.

# Open data can play a key role in informing discussion and decision-making

- Using data digitalization to inform climate change adaptation policy
- Using open data to achieve the SDGs by providing critical information on natural resources management, government operations, public services, and population demographics.
- Using data open data to improve cities and urban infrastructure. It can also improve resilience to disasters and ensure that essential resources will be deployed effectively in emergency situations.

# Open Development Network has partnerships in each of the Lower Mekong countries:

*...Creating a new way to engage with information.*
